CALVIN MINARD

Journeyman Machinist • CNC Programmer • CadCam Technician • Industrial Equipment Designer

Prince George, BC

cell: 778-675-6722

home: 250-967-0114

email: calvinminard@hotmail.com

PROFESSIONAL SUMMARY

Certified Red Seal Journeyman Machinist with 25+ years of CNC milling, manual machining, CAD/CAM programming, and industrial equipment repair. Experienced across ISO-9001 environments, multi-axis machining centers, turning centers, heavy industrial components, hydraulic cylinder rebuilds, and precision workflow execution. Strong background in Fusion 360, GibbsCAM, Mazatrol, and Heidenhain. Known for disciplined setups, problem-solving, and high-accuracy production.

CORE SKILLS

- CNC machining: Mazak, Haas, Toshiba, Heidenhain, Okuma, Mori Seiki
- CAD/CAM: Fusion 360, GibbsCAM (2.5D + Advanced 3D), Mazatrol conversational, MasterCam, Solidworks
- Manual machining: lathes, mills, drill press, broaching, saws
- Hydraulic cylinder repair & industrial component rebuilds
- Welding, fabrication, millwright collaboration
- 3D modeling, drawings, and equipment design
- Timber framing & structural carpentry
- 3D printing, prototyping, fiberglass mold making

WORK EXPERIENCE

Motion Canada — Machinist, Lead Programmer / Designer

Prince George, BC • 2016–2025

- Repaired hydraulic cylinders and industrial components through machining, welding, and assembly
- Manual machining: lathes, mills, drill press, broaching, saws
- Advocated for and helped implement the Haas VF-2 with TSC and Renishaw probing
- Programmed, set up, and machined production components using Fusion 360

- Designed mining-industry equipment: solid models, drawings, manufacturable components
- Collaborated with millwrights and field service technicians on troubleshooting and rebuilds

Northern Oil Tool (PV Manufacturing) — Lead Milling Programmer / Machinist

Leduc, AB • 2011–2014

- Programmed and operated Mazak M32 & 640M 4-axis machining centers
- Used GibbsCAM and Mazatrol conversational programming
- Machined Inconel drive shafts and complex oilfield components
- Completed GibbsCAM 2.5D and Advanced 3D training
- Achieved promotion to Lead Milling Programmer after exceeding expectations on a complex project
- Maintained exceptionally low scrap rates over extended periods

Apollo Machine & Welding — CNC Set-up Machinist

Edmonton, AB • 2008–2011

- Operated Toshiba 4-axis machining centers (777 & 888 controls)
- Machined Inconel and high-value offshore drilling components
- Performed setups, edits, and production machining in a high-precision ISO-9001 environment

Argus Machine — CNC Set-up Machinist

Edmonton, AB • 2007–2008

- Operated Heidenhain 3-axis machining centers, Okuma turning center
- Supported production of API and premium thread components
- Worked night shift in a high-precision, tight-tolerance environment

Weatherford Canada Partnership — Apprentice Machinist / CNC Set-up

Edmonton, AB • 2005–2007

- Operated Mazak HCN-8800 horizontal machining center with pallet changer, TSC, Renishaw probe
- Machined BOP components and heavy industrial parts
- Gained experience with large-format horizontals and multi-pallet workflow

Armor Machine — Apprentice Machinist

Edmonton, AB • 2005

- Exposure to 5-axis machining using Heidenhain controls
- Operated large-format machines producing whipstocks for directional drilling

- Learned macro-driven Heidenhain workflow and tooling strategies

Inspira Manufacturing — Apprentice Machinist / CNC Set-up / Programmer

Edmonton, AB • 2002–2005

- Ran Mazak AJ32 4-axis machining center using Mazatrol & G-code
- Operated Okuma & Mori Seiki turning centers
- Manual machining, surface grinding, multi-machine workflow
- Produced oilfield components for Sperry Sun / Halliburton
- Developed efficient setup strategies and strong ISO-9001 discipline

Factory & Foundry — CNC Operator / Production Worker

Ontario • 1997–1999

- Ran CNC machines in a multi-machine cell with short cycle times
- Gained production discipline, machine awareness, and workflow efficiency

Fibreglass Boat Builder — Laminator / Plug & Mould Maker / Assembly

Ontario • 1987–1997

- Full-cycle fibreglass production: mould prep, lamination, assembly, wiring, upholstery
- Built tops, tonneau covers, jet pump installations, hull-to-deck joining

EDUCATION & CERTIFICATIONS

- Red Seal Journeyman Machinist — NAIT
- GibbsCam 2.5D and 3D certificates
- CNC Machinist Operator Training — NAIT
- Electrical Foundations — CNC College
- Timber Framing Certificates — Shelter Institute & Island School of Building Arts

ADDITIONAL PROJECTS

- Designed mining-industry equipment at Motion Canada
- Built custom parts puller for millwrights
- Created 3D-printed QR-code marketing tools
- Designed aluminum logo keychains with anodized finish
- Built a 36" × 16' bandsaw mill from scrap material
- Created 3D-printed lamp, lithophane shade, geodesic dome bowl
